

METHOD, SYSTEM AND PROGRAM PRODUCT FOR CONTROLLING NATIVE APPLICATIONS USING OPEN SERVICE GATEWAY INITIATIVE (OSGi) BUNDLES

Abstract of the Invention

Under the present invention, a native application is packaged within an OSGi bundle to create a link there between. Then, the OSGi bundle is installed within an OSGi environment of a client device. Once installed, the OSGi bundle is deployed in a native environment of the client device and the native application is removed from within the OSGi bundle while maintaining the link. Thereafter, the native application within the native environment can be controlled from the server using the OSGi bundle within the OSGi environment.
